General information

The vehicle's technically permissible maximum laden mass and the technically permissible maximum laden mass on the axle must not be exceeded. Accessories retrofitted to the vehicle will reduce the load capacity and alter the mass on the axle. Subsequent modifications to the vehicle that affect its measured mass values are the vehicle owner's responsibility. With regard to the weight and dimensions as well as the equipment and designs, the technical data provided in this publication corresponds to the state of knowledge and production at the time of printing (June 2023). Dethleffs GmbH & Co. KG reserves the right to make changes or improvements to its products. We therefore recommend that during the information process and before concluding the contract, you consult our website and/or the CROSSCAMP authorised dealers to check for any changes in comparison to this publication.
